EDUCATION

University of California, Berkeley

Berkeley, CA

Bachelor of Arts in Computer Science & Statistics - GPA: 3.8/4.0

Expected May 2028

Relevant Coursework: Algorithms, Computer Architecture, Probability, Data Structures, Discrete Mathematics, Data Science, & Linear Algebra, Operating Systems, Machine Learning Optimization, & Internet

SKILLS

Languages: Python, Java, Rust, C, SQL, HTML/CSS, JavaScript, TypeScript, C#, C++

Data & ML: PyTorch, NumPy, Pandas, MongoDB, PostgreSQL, Redis Scikit-learn, LangGraph

Frameworks: Flask, FastAPI, Node.js, React.js, .NET

DevOps Tools: AWS, Docker, Kubernetes, Cursor, Claude Code, Postman, Jira

EXPERIENCE

Wells Fargo

May 2026 – Present

Incoming Software Engineer

San Francisco, CA

- Working on Internal Tooling with **Generative AI**

Natural Resources Lab - UC Berkeley

Aug 2025 – Dec 2025

Software Developer, Research

Berkeley, CA

- Achieved **99%** accuracy in simulating human temperatures for researchers by integrating their model into a web app with a **Node.js** backend to develop comfortable architectures
- Implemented **GraphQL** APIs and **SQL** database schemas to efficiently query and store simulation data

KiDrone

May 2025 – Aug 2025

Software Engineer Intern

Toronto, ON

- Achieved **95% terrain coverage** for autonomous reforestation drones using a **Python** backend
- Reduced deployment by **80%** by automating **CI/CD** pipeline with **GitHub Actions** that ran integration tests
- Communicated with non-technical stakeholders weekly to discuss progress updates, goals, and business tradeoffs

Nanotechnology Lab - UC Berkeley

Jan 2025 – May 2025

Software Developer, Research

Berkeley, CA

- Built an interactive dashboard to align and **visualize researcher's theoretical models** with experimental data
- Engineered a **Python-based modeling framework** for biosensors, integrating **Flask for web deployment**

Intellikgraph

Jan 2025 – May 2025

Machine Learning Researcher

Milpitas, CA

- Tuned a **Retrieval-Augmented Generation** pipeline using **PyTorch** and **LangGraph** to generate news reports
- Analyzed datasets with **Pandas** and **NumPy**, improving feature engineering & data quality for NLP models

PROJECTS

Autonomous Clash Royale AI | Python, Computer Vision, Deep Learning, AWS, Docker

- Engineered a **Computer Vision** pipeline to process videos, constructing states for downstream **perception** tasks
- Architected **data pipelines & automation algorithms** to extract & classify pixels with sub-millisecond latency
- Trained **deep learning** models to enable the agent to optimize decision-making strategies through continuous play
- Containerized the inference engine using **Docker** and deployed the training infrastructure on **AWS**, accelerating model iteration cycles and ensuring scalable, reliable execution

AWARDS & PROGRAMS

NVIDIA's Program: Developed custom kernel and memory optimizations to accelerate GPUs

V3X Robotics: Led a team in a Robotics Competition to 3rd place in the Central Valley Region

Hagan Scholar: Awarded \$30k in Scholarships & manage financial reports for \$10k in stocks

SJCOE M.E.S.A Competitions: 1st Place in Engineering Design & 2nd Place in both regional Coding & Math events
